Data Sheet N1595 Rev. -

Description:

The SMC431, TL431A and TL431 are 3-terminal adjustable precision shunt regulators with guaranteed temperature stability over the applicable extended commercial temperature range. The output voltage may be set at any level greater than 2.495V (VREF) up to 30V merely by selecting two external resistors that act as a voltage divider network. These devices have a typical output impedance of 0.08Ω. Active output circuitry provides a very sharp turn-on characteristic, making these devices excellent improved replacements for zener diodes in many applications. The precise ±0.5% reference voltage tolerance of the SMC431 makes it possible in many applications to avoid the use of a variable resistor, consequently saving cost and eliminating drift and reliability problems associated with it.

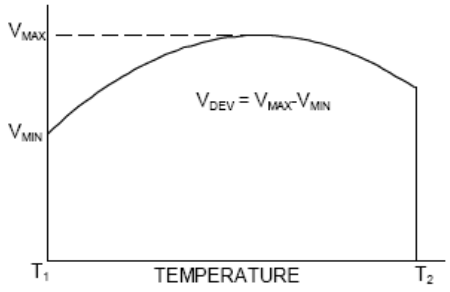
Note 1: Specifications are production tested at T_A=25°C. Specifications over the -40°C to 85°C operating temperature range are assured by design, characterization and correlation with Statistical Quality Controls (SQC).



Note 2: Deviation of reference input voltage, V_{DEV}, is defined as the maximum variation of the reference input voltage over the full temperature range.

The average temperature coefficient of the reference input voltage, αV_{REF} is defined as:

$$\Delta VREF\frac{ppm}{°C} = \frac{\pm\left[\frac{VMAX - VMIN}{VREF(at\ 25°C)}\right]10^6}{T2-T1} = \frac{\pm\left[\frac{VDEV}{VREF(at\ 25°C)}\right]}{T2-T1}$$

Where:
T_2–T_1=full temperature change.
αV_{REF} can be positive or negative depending on whether the slope is positive or negative.
Example: V_{DEV}= 9.0mV, V_{REF}= 2495mV,
T_2–T_1= 70°C, slope is negative.

$$\alpha VREF = \frac{\left[\frac{9.0mV}{2495mV}\right]10^6}{70°C} = -50ppm/°C$$

Note 3: The dynamic output impedance, R_Z, is defined as:

$$R_Z = \frac{\Delta Vz}{\Delta Iz}$$

When the device is programmed with two external resistors, R1 and R2, (see Fig. 2), the dynamic output impedance of the overall circuit, is defined as:

$$rz = \frac{\Delta V}{\Delta I} \cong Rz\left[1+\frac{R1}{R2}\right]$$
