

# S1M0060065B 650V Silicon Carbide Power MOSFET

#### **Description**

S1M0060065B is a single SiC Power MOSFET packaged in a T2PAK case. The device is a high voltage n-channel enhancement mode MOSFET which has very low total conduction losses and very stable switching characteristics over temperature extremes. The S1M0060065B is ideal for energy sensitive, high frequency applications in challenging environments.

#### **Circuit Diagram**

#### **Features**

- Positive temperature characteristics, easy to parallel.
- Low on-resistance typ. RDS(on) = 60 m $\Omega$ .
- · Fast switching speed and low switching losses.
- Very fast and robust intrinsic body diode.
- · Process of non-bright tin electroplating.
- "-A" is an AEC-Q101 qualified device.

#### **Applications**

- EV Fast Charging Modules
- EV On-Board Chargers
- Solar Inverters
- Online UPS/Industrial UPS
- SMPS (Switch Mode Power Supplies)
- DC-DC Converters
- ESS (Energy Storage Systems)
- China Germany Korea Singapore United States

#### DISCLAIMER:

- 1- The information given herein, including the specifications and dimensions, is subject to change without prior notice to improve product characteristics. Before ordering, purchasers are advised to contact the SMC Diode Solutions sales department for the latest version of the datasheet(s).
- 2- In cases where extremely high reliability is required (such as use in nuclear power control, aerospace and aviation, traffic equipment, medical equipment, and safety equipment), safety should be ensured by using semiconductor devices that feature assured safety or by means of users' fail-safe precautions or other arrangement.
- 3- In no event shall SMC Diode Solutions be liable for any damages that may result from an accident or any other cause during operation of the user's units according to the datasheet(s). SMC Diode Solution assumes no responsibility for any intellectual property claims or any other problems that may result from applications of information, products or circuits described in the datasheets.
- 4- In no event shall SMC Diode Solutions be liable for any failure in a semiconductor device or any secondary damage resulting from use at a value exceeding the absolute maximum rating.
- 5- No license is granted by the datasheet(s) under any patents or other rights of any third party or SMC Diode Solutions.
- 6- The datasheet(s) may not be reproduced or duplicated, in any form, in whole or part, without the expressed written permission of SMC Diode Solutions.
- 7- The products (technologies) described in the datasheet(s) are not to be provided to any party whose purpose in their application will hinder maintenance of international peace and safety nor are they to be applied to that purpose by their direct purchasers or any third party. When exporting these products (technologies), the necessary procedures are to be taken in accordance with related laws and regulations..
